

**Postdoctoral Position in Chemical Biology
University of Minnesota**

The Harki lab (z.umn.edu/harki) at the University of Minnesota, Department of Medicinal Chemistry has an immediate opening for a Postdoctoral Research Associate. The position is NIH-funded and the initial term of appointment is 1-year. Start dates are negotiable. Multiple projects are available that are associated with the development of chemical probes against APOBEC enzymes and transcription factors. The ideal candidate will have experience in protein expression and purification, biophysical assays (*e.g.*, SPR, ITC, *etc.*), and biochemical/cellular assays (*e.g.*, EMSA, confocal microscopy, *etc.*). A Ph.D. in chemistry, medicinal chemistry, biochemistry or related area is required. Motivated applicants with a desire to work across the chemistry-biology interface are encouraged to apply.

To apply, email (daharki@umn.edu) Professor Harki the following materials:

- (1) A current CV
- (2) A short statement of previous research experiences and postdoctoral research interests
- (3) The names and contact information for two references
